

## Task description

---

Build a web application with your preferred tech stack. The said web application should have following features.

Table displaying following details of a user

- Name
- Age
- Gender
- Address
- Email
- Image

Add new user button

- on clicking the button a new user will be fetched from the randomuser API(URL: "https://randomuser.me/api") and displayed in the list.

**NOTE** All previously fetched users should be persisted.
